SDG 11: SUSTAINABLE CITIES AND COMMUNITIES

NEWSCAST

A newscast produced by students from Spain explaining their involvement in the renovation of their school playground.

At Rubén Darío School in Barcelona, a new project was implemented to analyze how to create a better environment and participate in reducing pollution in our neighborhood, which is situated in the city center.

Students came up with the idea of researching local plants and planting them in their school's playground. The project was approved, and now we have various types of medicinal plants with automatic watering.
